13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy Production Co, LP respectfully requests to move the surface hole locations so as to comply with the APD Comidition of Approval addressing pad size restriction. A buried pipeline is located to the northwest of the proposed location and oil contamination resulting from a historical pipeline leak was observed within the pipeline right-of-way. The revised surface hole locations will allow Devon to construct the originally-permitted 470 ft x 350 ft drilling pad without encroaching on the pipeline right-of-way. Devon will restore the surface location per the previously-approved interim and final reclamation plans but will not be responsible to reclaim the already distressed areas associated with the pipeline leak.

New surface location calls are as follow:
Serene Sisters 25 Federal 1H: SL - 254' FNL & 953' FEL
Serene Sisters 25 Federal 2H: SL - 267' FNL & 1002' FEL
