13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposed is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/ BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BOPCO, L.P. respectfully requests approval to build a new tank battery at the PLU 320 location located in section 4, T24, R30. The location was recently built as a new drill pad. The well has been moved due to bottom hole location. The battery will be built and will service wells that are being drilled (PLU 319H) and future wells that have been staked, these include the following, 316H, 317H, 318H, 321H, 322H, 323H, 331H, 332H. This location will prevent the need to increase the size of a future location. The location is located close to all the wells that are being planned and has good access for trucks and limit the long flow line that will be needed. As soon as the size of the battery is determined, a site security diagram will be submitted and the location will be down sized.
