- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletable in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

06/14/2012. Each bare area (identified as area A1, A2 & A3) will be excavated to the perimeter of visible vegetation to a depth of 5' below ground surface

06/19/2012. The material will be stock piled on location without liner as field titrations results indicate minimal chloride contamination.

06/20/2012. The excavated material will be mixed and blended with organics (fresh dairy manure), using the organic loading calculations for the proper mixture. Area A1 will require two tons, Area A2 will require two tons, and Area A3 will require three tons. Once accomplished the mixed and blended material will be backfilled into each excavation.

06/26/2012. At the completion of backfilling the site will be re-contoured to the surrounding area and re-seeded using an approved BLM seed mixture
