13 Describe Proposed or Completed Operation Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection)

On August 19, 2012, the tank facility on the Cedar Lake SWD was struck by lightning and destroyed. We are in clean-up stage and the battery will have to be rebuilt.

Judah Oil respectfully requests to construct a temporary Truck Unloading Station for produced water. This station will consist of twelve (12) 500 BBL horizontal frac tanks, and one (1) 500 BBL skim oil tank. We will install high level shut-offs, lightning protection, drip pots on unloading lines, burned and will be supervised on a twenty-four basis. The temporary facility will be constructed on the same pad as the original facility. This temporary facility will be operable until the permanent facility is put back into production.
