## 13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof.

If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation plans to go back to original Morrow and add additional perforations as follows:  
Set a 7" compression packer at +/-7700'. Clean out casing to the CIBP at 9150'. Drill out the cement and CIBP using treated water. Clean out down to 9250', this will ensure no debris is across any of the Morrow perforations. Perforate Morrow 9112'-9120' (49). Stimulate as needed. Well will have open Morrow perfs 9112'-9120' and 9180'-9195'.
