Well: BANDIT STATE #006

User Name	Comment	Comment Date
JCMAXEYJR	Application for drilling pit. Depth to groundwater is over 100 feet per State Engineer website. Distance to nearest fresh water well and nearest surface water is over 1000 feet. The pit liner will be 12 mils thick. The pit will be approximately 120 feet square and be constructed and operated so as to contain liquids and solids to prevent contamination of fresh water and protect public health and the environment. This pit will not be located in, or adjacent to, a watercourse, lakebed, sinkhole, or playa lake. The pit will be fenced to prevent access by livestock.	5/18/2005
