Yates Petroleum Corporation request to extend the captioned well's APD expiration date for one (1) year to July 18, 2006.
Any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines with an approved general permit on file. The State Engineers Web Site has been accessed for the captioned well. Information obtained from the site determines the Site Ranking for this well is 20 Points. With this ranking score excavation and removal of drilling materials will take place at pit closure. Sources at Yates Petroleum Corporation have relayed information to me that they believe there will not be enough H2S anticipated from the surface to the Pre-Cambrian Formation to meet the OCD's minimum requirements for the submission of a contingency plan per Rule 118.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☒ or an (attached) alternative OCD-approved plan ☐.
