## NOTICE OF VIOLATION - Inspection

Dear Operator:

The following inspection(s) indicate that the well, equipment, location or operational status of the well(s) failed to meet standards of the New Mexico Oil Conservation Division as described in the detail section below. To comply with standards imposed by Rules and Regulations of the Division, corrective action must be taken immediately and the situation brought into compliance. The detail section indicates preliminary findings and/or probable nature of the violation. This determination is based on an inspection of your well or facility by an inspector employed by the Oil Conservation Division on the date(s) indicated.

Please notify the proper district office of the Division, in writing, of the date corrective actions are scheduled to be made so that arrangements can be made to reinspect the well and/or facility.

### INSPECTION DETAIL SECTION

**GOVERNMENT D No.010**

<b>Violations</b> Exceeded Allowable Inj. Pressures						

**Comments on Inspection:** Injection Pressure Over Limit. (Rule 703/704 B.) Maximum allowable pressure is 581, pressure gauge reads 840. Well is active and being injected into at time of inspection. Flow meter reads 1305.6 total barrels and 273.6 barrels per day. Well is in violation of injection permit and is to be shut-in immediately. Contact OCD prior to return to injection. Phone call made to Operator rep, Rip Clary to shut well in.

In the event that a satisfactory response is not received to this letter of direction by the "Corrective Action Due By:" date shown above, further enforcement will occur. Such enforcement may include this office applying to the Division for an order summoning you to a hearing before a Division Examiner in Santa Fe to show cause why you should not be ordered to permanently plug and abandon this well. Such a hearing may result in imposition of CIVIL PENALTIES for your violation of OCD rules.

Sincerely,

Artesia OCD District Office
