I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Operator,

The NMOCD District 2 Office (OCD) is in receipt of a Closure Proposal prepared and submitted by your agent, Environmental Plus Inc. for a produced fluids release that occurred at the above referenced well site on or about May 29, 2005. The document submitted proposes to remediate site at time of tank battery decommission.

According to available ground water information for this area, the well site is situated in a possible water sensitive area. The proposal to leave contaminants in place for any length of time is denied.

An inspection of the site by OCD personnel on 9/13/05 shows that area appears to have had recent releases, possibly after initial excavation at site. (Photos enclosed)

At this time, the OCD is requesting the following:

1. Equipment be repaired or replaced to minimize the possibility of continued and future releases at this site.
2. Site is to be delineated for vertical and horizontal extent of contamination and type and levels of contaminants present.
3. A remediation work plan is to be formulated based on OCD guidelines and presented to the OCD for review.
4. Please have work plan submitted to OCD no later than September 30, 2005

If I can be of assistance in this matter, my contact information is listed below.

Thank you,

Mike Bratcher
