13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Reclamation work has been completed.  
Yates will continue to monitor until BLM objectives have been met. A Final Abandonment Notice will be submitted when the potential for successful revegetation is established.

Michelle,

The above abandoned well location was inspected 11/12/12. A few minor issues were identified and will need some attention prior to Final Abandonment. We have concerns with a poly flow running along the reclaimed access road with some traffic on the reclamation to lay the line. This will become a new compacted road if left as is. There is a pipe riser of some sort west of the DHM that will need to be removed. For the most part the pit area is looking good. However, there are a couple of barren areas that may have some minor salt impact and may need additional remediation at some point. Lastly, there are some minor amounts of trash that needs to be removed.

My suggestion is to monitor for a growing season, then check for salt impacts to the location and the pit area and take remedial action as needed. At that time the post and miscellaneous trash/debris should be removed. Then continue to monitor until such time as objectives are met.

If any questions, please call.

Thanks,

James A. Amos
