Describe Area Affected and Cleanup Action Taken.* APPROX 45' X 40' ON CALICHE. WELL PAID

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Re: Culwin Queen Unit 013 A-1-19s-30e 30-015-04584 Incident # nMLB0526353923

The New Mexico Oil Conservation Division District II Office is in receipt of an Initial Report C-141 reporting a produced fluids release that occurred on 9/14/2005 at or near the above referenced well site.

Please submit a Corrective Action Work Plan to this office for correction/remediation of this release. Please use the "Guidelines For Remediation of Leaks, Spills, and Releases" as your guide.

This document may be found on the NMOCD web site: www.emnrd.state.nm.us/ocd , under Publications/Environmental Handbook/Miscellaneous Guidelines/Spill Prevention Clean up.

The work plan presented to the NMOCD must include general site characteristics, site ranking score, soil remediation action levels, soil remediation methods, and planned analytical testing for TPH, B-TEX , Chlorides or any other CoCs as applicable.

A final Form C-141 is required for closure of the release incident and must include a report of remediation actions taken with final analytical results attached.

BLM approval required if applicable.

Please have the requested work plan in the Artesia office on or before October 18, 2005. The NMOCD District II Office must be notified 24 hours prior to any remediation actions and/or subsequent soil samples taken for analysis.

In the event that a satisfactory response is not received to this letter further enforcement will occur. Such enforcement may include this office applying to the Division for an order summoning you to a hearing before a Division Examiner in Santa Fe. Such a hearing may result in imposition of **CIVIL PENALTIES** for your violation of NMOCD rules.

If I can be of assistance in this matter, my contact information is listed below.
