The APD             showed to remove 15' from the northeast side of location and 60' from the southeast side.             Apache Corporation would like to propose taking 18' from the northeast side and 20' from             the southeast side, leaving approximately 20' from edge of location to the achors. The             other two side of the location will be used during fracing and workovers.         </pre> <pre>             Please see attached drawings and other documentation.</pre>	Final Abandonment Notice					Report of
If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zone Attach the Bond under which the work will be performed or provide the bond No. on file with the BLM / BLA. Required subsequent reports shall be filed within 30 d following completion of the involved operations. If the operation results in multiple completion or recompletion in a new interval, a from 31604 shall be filed only after all requirements, including reclamation, have been completed, and the operator has determine that the site is ready for final inspection.)  Apache Corporation would like to request a varience from the approved interim reclamation. The IR Plat suggested dthat the location 270' x225', but the actual size is 216' x 252', the wellbore is offset, therefore the anchors are in different areas. The APD showed to remove 15' from the northeast side of location and 60' from the southeast side. Apache Corporation would like to propose taking 18' from the northeast side and 20' from the southeast side, leaving approximately 20' from edge of location to the achors. The other two side of the location will be used during fracing and workovers.  Please see attached drawings and other documentation.
