OTHER: ☐

12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompilation.

Yates Petroleum Corporation respectfully requests approval for Off lease Measurement and Surface Commingle gas only the following wells:

Crow ASM State Com #1  
Section 32-T16S-R28E  
Formation: Crow Flats/Morrow  
Eddy County, New Mexico  
State Lease: V-4129

Crow ASM State #2  
Section 32-T16S-R28E  
Formation: Dog Canyon/Wolfcamp  
Eddy County, New Mexico  
State Lease: VO-5053

The battery is located at the Crow ASM State Com#1.

Total gas production & sales will be based on allocated chart intergration.

The ownership is identical.

The proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production.

The purpose of the Off lease Measurement and Surface Commingling, is to reduce operating costs for storage and treating, thereby extending the economic life of each well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to built separate facilities for each well. This will greatly increase costs and shorten the economic life of the well.

The proposed commingling is necessary for economic operation of the above referenced leases.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
