The gas production from the East Millman Unit is being sold to DCP Midstream, LP who has notified us that we will be put on a rolling curtailment cycle where the gas production will need to be flared for 2 weeks followed by 6 weeks of normal production and sale of gas. This curtailment cycle will be for an indefinite period of time and will start March 15, 2013. Stephens & Johnson Operating Co. plans to install a treating facility so that we can treat the gas and not be curtailed. We estimate that it will take 3 to 6 months to install the necessary treating equipment. Attached is a list of the producing wells that are affected and a form C-129 Application for Exception to No Flare Rule 19.15.18.12
