Subject: Proposed New Well at Cedar Lake
Attachments: Cedar Lake - New Proposed Well with alternate site.pdf

Mike and Terry,

Attached is the scanned 3-2-2012 Google Image with the location of the currently proposed New Well marked. This is based upon the lat.long. given to Terry.

It appears that this well site is within the throat of the floodway/spillway from Cedar Lake. Upon review of this image, I suggest that the location be moved about 340 feet to the SE. It is marked as the "Possible New Well relocation". This relocated site should be at least as far away from the high water mark of Cedar Lake as the Recent Well, also shown on this image.

Thanks for the well location clarification,

Anchor Holm
