Jim Amos (BLM) Mike Bratcher (OCD..left message)

Was a Watercourse Reached?

☐ Yes ☒ No

If YES, Volume Impacting the Watercourse.

If a Watercourse was Impacted, Describe Fully.\*

(\*Please include API#\*)

Describe Cause of Problem and Remedial Action Take

6/16/13 Pumper arrived on location and noticed oil around bottom of tanks. Pumper called me and I notified Terry Ainsworth (Cimarex), Jim Amos @ BLM and Mike Bratcher @ OCD (Left Message). Could not see any visible signs where oil leaked out of oil tank. Spill was contained inside unlined containment.

Describe Area Affected and Cleanup Action Take

Around oil tanks inside containment. Emptied oil tank with hole, picked up standing oil. Talon to do assessment and work plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
