2. New soil was transported to the location from a local borrow pit. 1-foot of caliche was placed over the closed drilling pit and 2-foot new top soil was placed over the drilling pit area. The soil lift was contoured to match the surrounding terrain.
3. Windrows were installed to divert run off waters for erosion control. The drilling pit was seeded on June 6, 2013 using 50% BLM seed mix #3 and #4. The seeding label is attached.
