

## OCD Artesia

Form 3160-5  
(August 2007)UNITED STATES  
DEPARTMENT OF THE INTERIOR  
BUREAU OF LAND MANAGEMENTFORM APPROVED  
OMB No. 1004-0137  
Expires: July 31, 2010**SUNDRY NOTICES AND REPORTS ON WELLS**  
*Do not use this form for proposals to drill or to re-enter an abandoned well. Use Form 3160-3 (APD) for such proposals.*

SUBMIT IN TRIPLICATE - Other instructions on page 2.

## 1. Type of Well

☐ Oil Well ☐ Gas Well ☒ Other Well is plugged & abandoned (P&A'd).2. Name of Operator  
CHEVRON MID-CONTINENT LP3a. Address  
15 SMITH ROAD  
MIDLAND, TX 797053b. Phone No. (include area code)  
(432) 498-8600

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)

5. Lease Serial No.

6. If Indian, Allottee or Tribe Name

7. If Unit of CA/Agreement, Name and/or No.

8. Well Name and No.  
QUAHADA RIDGE 31 #19. API Well No.  
31-015-2766610. Field and Pool or Exploratory Area  
N32 20' 54.10", W104 01' 51.10"11. Country or Parish, State  
Eddy County, New Mexico

## 12. CHECK THE APPROPRIATE BOX(ES) TO INDICATE NATURE OF NOTICE, REPORT OR OTHER DATA

TYPE OF SUBMISSION	TYPE OF ACTION			
<input checked="" type="checkbox"/> Notice of Intent	<input type="checkbox"/> Acidize	<input type="checkbox"/> Deepen	<input type="checkbox"/> Production (Start/Resume)	<input type="checkbox"/> Water Shut-Off
<input type="checkbox"/> Subsequent Report	<input type="checkbox"/> Alter Casing	<input type="checkbox"/> Fracture Treat	<input checked="" type="checkbox"/> Reclamation	<input type="checkbox"/> Well Integrity
<input type="checkbox"/> Final Abandonment Notice	<input type="checkbox"/> Casing Repair	<input type="checkbox"/> New Construction	<input type="checkbox"/> Recomplete	<input type="checkbox"/> Other
	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Chevron well "Quahada Ridge 31-1"

About five years ago the well was P&A'd. A liner was installed over the reserve pit, and it was capped over with caliche and on-site soil. The pad area -- occupying approximately 1.5 acre -- was windrowed and planted with BLM seed mix #4. Vegetative cover success has been poor in some places. To cure this deficiency, the following treatments will be applied over the entire 1.5-acre area:

Prior to any invasive activities, a One Call utilities clearance will be conducted followed by a ground penetrating radar survey of the area. As requested by BLM, a diversion ditch will be excavated across the NW boundary of the site to drain water SE off the site. Vegetation will be scraped from between the windrows across the 1.5-acre site; and this removed vegetation will be stacked off-site for wildlife use. A 2-inch-thick layer of crushed gypsum (approximately 320 tons) will be applied to the surface between the windrows. The area between the windrows then will be disced to a depth of approximately one foot (1') to incorporate the gypsum. At this point, clean topsoil will be spread evenly between the windrows to a depth of approximately one foot (1') -- approximately 1,900 cu. yd. of clean topsoil will be required. Finally, a BLM-approved seed mix will be drilled into the newly-placed topsoil, and a nitrogen fertilizer will be applied.

It is anticipated these reclamation efforts will achieve sustainable vegetative cover across the site.
