N/A													
Describe Cause of Problem and Remedial Action Taken.*													
	A water transfer line east of the battery at the tin horn ruptured. Describe Area Affected and Cleanup Action Taken.*												
Release occurred at the tin horn and flowed south along the pipeline right-of-way. All wells were turned off, valves were closed, foreman was notified and													
crews were called to fix the water line. A crew was called to do initial clean-up of the area, and all excavated soils were disposed of at an approved NMOCD facility. Vertical and horizontal delineation samples will be taken and sent to a NMOCD approved facility. Depth to Ground Water: >100'													
(approximately 150', Section 11, T22S-R31E, per Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE													
RANKING IS 0.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger													
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability													
should their o	should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health												
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
