13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

LRE requests administrative approval to downhole commingle the existing Artesia, Glorieta-Yeso (96830) and the proposed Red Lake, San Andres (97253). The well was originally completed in the Yeso on 10/28/09. An NOI sundry to recompleate into the San Andres has been submitted to your office. Both intervals have common ownership (Category #1), & we have not experienced any significant cross flows, & all the fluids are compatible. Downhole commingling will improve recovery of liquids & gas, eliminate redundant surface equipment, which reduces the environmental impact, & maximize productivity. Notice has been filed concurrently on form C-107A with the State.

LRE is requesting approval to commingle the two pools upon completion of the recompleation rig operations. The production allocation will be calculated by subtracting the current Yeso producing rate of 4 BOPD & 82 MCF/D from the commingled production (after about 2 months of commingled production). See the attached C-107A, WBD & other supporting data, which has been filed with the State.

14. I hereby certify that the foregoing is true and correct
