Describe Cause of Problem and Remedial Action Taken.*

High winds caused the power pole line fuse to trip which lead to the tanks overflowing and spilling 400 bbls of produced water and 4 bbls of oil onto the ground. A vacuum truck recovered 400 bbls of fluids and the power was restored to the battery location.

Describe Area Affected and Cleanup Action Taken.*

The affected area is 20' x 60' inside the containment area and 15' x 20' outside the containment area. Remediation will be completed in accordance with a remediation plan approved by NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
