#### Describe Cause of Problem and Remedial Action Taken.\*

Bad collar on 2" steel line, collar and joint replaced. A vacuum truck was utilized to capture approximately 10 bbls of fluid.

#### Describe Area Affected and Cleanup Action Taken.\*

There was approximately 3500 sf. ft of impacted pad and pasture area. The spill was delineated by Diversified Field Services, Inc. Impacted soils were removed to a NMOCD approved disposal facility. Confirmation samples were then submitted to a commercial lab for analyses. Backfill of the excavation was approved by the NMOCD and the BLM. The excavation was backfilled and the site was contoured to the surrounding landscape. The area was seeded with Lesser Prairie Chicken seed mix.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
