13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

OXY USA WTP LP, request approval to extend the surface pad of the McKittrick Hills 24 Federal #1. Please see attached location maps and facility diagram outlining the proposal. OXY must extend the location by 100'x50' to allow the safe setting of a second compressor. The pad extension allows the OXY compressor to be placed at a safe distance away from fire sources.

BLM Site Assesment was completed by Tanner Nygren and adjustments were made based on his recommendations to the attached diagram.

14. I hereby certify that the foregoing is true and correct
