Describe Cause of Problem and Remedial Action Taken.*
Manway plate on VRU tower leaked. Repairs have been completed.

Describe Area Affected and Cleanup Action Taken.*
4.5 BBLs of the 5BBLs oil lost were recovered by Arapahoe Trucking by vacuum truck on May 8, 2014. The spill originated on the SE side of the well pad inside containment. The dike had a hole in it allowing approximately 80% of the spilled fluid to escape containment. Soil samples have been taken for testing

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
