NATURE OF RELEASE

| | | |
|------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------------|
| Type of Release Produced Water | Volume of Release 4 bbls | Volume Recovered 0 bbls |
| Source of Release Stuffing box | Date and Hour of Occurrence 12/3/12 1:30 pm | Date and Hour of Discovery 12/3/12 2 pm |
| Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required | If YES, To Whom? Terry Gregston - BLM | |
| By Whom? Joe Hernandez | Date and Hour 12/4/12 3 pm | |
| Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | If YES, Volume Impacting the Watercourse. | |

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* Supervisor received a call from the chemical tech that the well was leaking. Produced water was leaking from the well packing. The well was turned off and the well was re-packed.

Describe Area Affected and Cleanup Action Taken.* The release affected 1,151 sq ft in the lease pad and in the pasture. RECS personnel arrived on site on December 5th, 2012 to begin work at the Turner B #93. The release area had already been scraped down six inches, thus samples were taken from the surface of the six inch scrape. Four samples were taken throughout the release area and taken to a commercial laboratory for analysis. Laboratory chloride levels were elevated at all four points; however, GRO, DRO and BTEX readings were low. On February 26th, 2013, three of the four points were augured down for depth. These samples were taken to a commercial laboratory for analysis. In the three augur points, chloride levels decreased with depth and GRO, DRO and BTEX remained low throughout. On May 3rd, 2013, a Corrective Action Plan (CAP) was submitted to NMOCD and BLM which was approved on May 23rd, 2013. On July 7th, 2013, RECS personnel were on site to begin the approved CAP actions. The release area was excavated down to 1 ft bgs and field samples were taken and tested for chlorides and hydrocarbons. Based on this data, parts of the release area were excavated further until chloride field samples returned results below 1,000 mg/kg. A total of 156 yards of excavated material was taken to a NMOCD approved facility for disposal. BLM gave verbal permission on July 22nd, 2013 for RECS to take final samples of the excavation. On July 23rd, 2013 final samples were taken throughout the excavation and taken to a commercial laboratory for analysis of chlorides, hydrocarbons and BTEX. Laboratory results of the excavation showed chloride levels below 1,000 mg/kg and low GRO, DRO and BTEX readings. RECS submitted the final data to BLM and NMOCD on July 30th, 2013 and asked for permission to backfill the site. BLM gave permission to backfill the site on July 31st, 2013 and NMOCD gave permission to backfill the site on August 9th, 2013. On August 21st, 2013, the lease pad was backfilled and berms were erected around the site with 216 yards of clean, imported caliche. The ravine sidewalls were knocked down to a 3 to 1 slope. On August 23rd, soil amendments were added to the site and the site was seeded with LPC seed mix.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
