If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A flange connection from the frac hose to the water transfer pump broke. The water transfer pump was shut down until the broken flange could be replaced.

Describe Area Affected and Cleanup Action Taken.* The release impacted approximately 12,476 sq. ft. of pasture. All of the free standing fluid was recovered with vacuum trucks. Basin Environmental collected soil samples throughout the pond area on 10/2/14 to help determine the amount of PW lost in the soil. BOPCO is in the process of obtaining permission from the State Land Office to access and remediate the area. The area will be cleaned up in accordance to the NMOCD remediation guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
