NATURE OF RELEASE

Type of Release Oil	Volume of Release 30bbls	Volume Recovered 29.5bbls
Source of Release Tank	Date and Hour of Occurrence 9/21/14	Date and Hour of Discovery 9/22/14 11am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Left Voicemail on Operator Dist II Phone	
By Whom? Heather Dolphin Sr. Regulatory Specialist	Date and Hour 9/22/14 4:15pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. n/a	

If a Watercourse was Impacted, Describe Fully.*

n/a

Describe Cause of Problem and Remedial Action Taken.*

A dump valve stuck on a separator at the Fedell Battery and it put water and oil into water tank. The spill over on the tank was plugged up and ran the tank over. Due to the rain and storms out there the ground was wet enough that it did not soak in.

Describe Area Affected and Cleanup Action Taken.*

The spill was contained inside the firewall with the exception of a rabbit hole in the bottom. The oil was cleaned up with a vacuum truck and put back into the tank.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
