NFO Permit No. _____
(For Division Use Only)

APPLICATION FOR EXCEPTION TO NO-FLARE RULE 19.15.18.12

(See Rule 19.15.18.12 NMAC and Rule 19.15.7.37 NMAC)

- A. Applicant COG Operating LLC,
whose address is One Concho Center, 600 W. Illinois Ave., Midland, TX 79701,
hereby requests an exception to Rule 19.15.18.12 for 90 days or until
January 6, Yr 2015, for the following described tank battery (or LACT):
Name of Lease Paint 32 Fee 1H Name of Pool Penasco Draw; San Andres, Yeso
Location of Battery: Unit Letter L Section 32 Township 18S Range 26E
Number of wells producing into battery 4
- B. Based upon oil production of 300 barrels per day, the estimated * volume
of gas to be flared is 430 MCF; Value _____ per day.
- C. Name and location of nearest gas gathering facility:
Agave
- D. Distance _____ Estimated cost of connection _____
- E. This exception is requested for the following reasons: Line Rupture.
#1H API# 30-015-39623, #2H API# 30-015-39623, #3H API# 30-015-39974, #4H API# 30-015-39624
Please see flare location on attachment.

OPERATOR

I hereby certify that the rules and regulations of the Oil Conservation
Division have been complied with and that the information given above
is true and complete to the best of my knowledge and belief.

Battery-	Paint 32 Fee 1H	
Production-	300 Oil, 430 MCF	
Total BTU of Htrs-	1,000,000	
Flare Start Date-	10/6/2014	Flare End Date- 1/6/2015
UL Sec-T-R-	Unit L, Sec.32-T18S-R26E	GPS- 32.70327-104.41241
# of wells in bty-	4	# of wells to be flared- 4
Reason For Flare-	Agave main line rupture	

Site Diagram

The site diagram illustrates the layout of the well battery and surrounding infrastructure. A compass rose in the top left corner indicates North (N), South (S), East (E), and West (W). A road, represented by a vertical line with a downward arrow, is located to the left of the well battery. The well battery consists of five circular wells arranged vertically on the left side, labeled from top to bottom: '500 Wtr', '500 Wtr', '500 Oil', '500 Oil', and '500 Oil'. Below these are three more circular wells labeled 'Htr', 'FWKO', and 'Sep'. At the bottom left is a rectangular box labeled 'Tester'. In the center of the diagram is a vertical rectangular box labeled 'Pump Jack' with a small circle below it, labeled 'Paint 32 Fee 1H'. At the bottom right is a rectangular box labeled 'Flare'.

CONDITIONS OF APPROVAL for FLARING or VENTING GAS

1. Venting gas is absolutely not allowed.
2. Prior to flaring gas, C-129 must be filed & approved. Blanket approval cannot be given for this operation.
3. Flared volumes of gas are to be metered & reported.
4. Flares WILL be manned at all times. Brush should be cut down to 1 or 2 inches around flare stack at least a radial distance of 2 times the height of the flare stack.
5. Flares WILL NOT be left unattended.
6. No flaring operations to be conducted during red-flag days.
<http://www.gacc.nifc.gov/swcc> (go to "Predictive Services" on SWCC website) to check for red flag warnings.
7. Follow safe practices for flaring guidelines.
8. Permit may be rescinded at any time by NMOCD.
9. If well is able to be connected to a gas gathering system, it will be done so as soon as possible.
10. Flaring of gas is prohibited. The State Forester grants an exception to the prohibition on open fires for the flaring of natural gas when the following conditions are met. Unless flaring is needed for safety purposes, flaring pursuant to this exception shall not be done on days that are "red flag days" as determined by the National Weather Service or on days when the sustained wind is in excess of 25 miles per hour in the area.
- 11.1. The day is not a "red flag day" as determined by the National Weather Service and the sustained wind is not in excess of 25 miles per hour in the area.

- 12.2. The local fire department and county dispatch are notified at least 24 hours in advance of anticipated releases that will result in flaring. If flaring is done by an automated system then the schedule of flaring shall be provided to the local fire department and county dispatch. The area is mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris shall be cleared in the area for a distance of one and one half times the height of the stack.
- 13.3. At least one adult is on site with communications equipment adequate to reach county dispatch and the local fire department in the event of a fire. The individual should also be equipped with a shovel and a water backpack pump or other equipment to deliver water to suppress a fire.
- 14.4. If flaring is to take place at an unmanned facility, then the area around the flare stack is mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris shall be cleared in the area for a distance of three times the height of the stack.

Notice to Oil and Gas Facilities and Operators Flaring Gas in New Mexico

SANTA FE, NM – The Oil Conservation Division (OCD) encourages all oil and gas facilities with flare stacks and well operators that are flaring gas to upgrade their *Fire Awareness Programs* this year. New Mexico State Forestry reports that 362 fires burned 6,879 acres on state and private land in calendar year 2013.

Forecasts remain dismal this spring with fewer chances for normal precipitation, particularly in southwestern New Mexico and southeastern Arizona. Temperatures are expected to be higher than normal.

Open flames and gas flares should be monitored carefully and oil and gas operators should create a defensible space to help prevent wildfires. Defensible Space is the area around a structure where combustible vegetation that can spread fire has been cleared, reduced or replaced. This space acts as a barrier between a structure and an advancing wildfire.

This means that as a general rule of thumb, the area around staffed flaring facilities should be mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris should be cleared in the area for a distance of at least one and one half times the height of the stack.

If flaring is to take place at an unstaffed facility, then the mowed area around the flare stack should be increased to three times the height of the stack. On "red flag" days local fire departments should be notified prior to the flaring operations.

During the course of the upcoming fire season, it may become necessary for New Mexico State Forestry to issue fire restriction on State and private land. Log on to www.nmforestry.com for updates or to get information on how contact your local State Forestry District office.

For the latest fire weather information please visit USDA Forest Service website:
http://gacc.nifc.gov/swcc/predictive/outlooks/monthly/swa_monthly.pdf
