If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Automation failure, caused tanks to run over. Fluid was recovered and all the fluid remained inside the bermed area.

Describe Area Affected and Cleanup Action Taken.*

The leak affected 1,903 sq. ft. of caliche pad within the facility containment area. Impacted soils were removed to a NMOCD approved disposal facility. Soil samples were collected from the 1 ft. deep excavation and sent to a commercial laboratory for confirmation of chloride and TPH. The excavation was backfilled with clean caliche and leveled.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
