NATURE OF RELEASE

Type of Release: Oil & Produced Water	Volume of Release: 25bbls	Volume Recovered: 0
Source of Release: Flowline	Date and Hour of Occurrence: 09/28/2011 - 0700	Date and Hour of Discovery: 09/28/2011 - 0800
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? T. Gregston, BLM, M. Bratcher, OCD	
By Whom? Fred Holmes	Date and Hour: 09/29/2011 - 0730	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*:

Describe Cause of Problem and Remedial Action Taken.*: Coupling thread integrity failed, back pressure caused line to break. Well was shut in, and repairs were made to the line.

Describe Area Affected and Cleanup Action Taken.* : Area is "tear-drop shaped" which includes road and portions of the pasture. Pasture area impact is approx. 560' long, the wider portion of the spill area is approx. 50' in diameter and as it goes northward, it is reduced to 10-15' wide. Impacted soils above regulatory threshold levels were manually and mechanically excavated from the spill area. During the course of the excavation soil samples were screened on site to determine the progress of the remediation. Impacted soils were transported off-site for disposal at Lea Land Landfill. Once the impacted soils were removed to acceptable levels, the pasture areas and road areas were backfilled with like materials and smoothed to grade. The pasture area was seeded with a BLM mix #2 and #4. Water bars were installed to prevent wind and water erosion.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
