### NATURE OF RELEASE

Type of Release	Brine	Volume of Release	20 bbls	Volume Recovered	0 bbls
Source of Release	Overfilled frac tanks	Date and Hour of Occurrence	3/23/2012 0300	Date and Hour of Discovery	3/23/2012 0300
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Transport driver fell asleep while unloaded his truck into the frac tanks on location, when the tanks overflowed onto the location pad.

Describe Area Affected and Cleanup Action Taken.\*

The leak affected the caliche pad surrounding the wellhead. The impacted areas were excavated to 1 ft. below ground surface. Representative grab samples were collected from the excavation, field tested, and sent to a commercial laboratory for chloride analysis. Impacted soils were removed to a NMOCD approved disposal facility. The excavations were backfilled with clean imported caliche and leveled.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
