Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

At the Snapping 2 State 4H battery, a miscommunication between two well watchmen led to the overflow of a frac tank. A vacuum truck was immediately called to location.

Describe Area Affected and Cleanup Action Taken.* Banta was immediately contracted for the correction of this release. The impacted area from this release was excavated to a depth of 2-feet deep. Talon/LPE was contacted to do the analytical testing. The OCD gave permission to backfill the excavation on September 13, 2012. The excavation was backfilled to grade using new material and contoured to match the surrounding location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
