We fractured this well in the Grayburg/San Andres formations on 11/29/10. During flowback and testing it became apparent we had fracked into an offsetting injection well, likely the Capstone Natural Resources Lea "C" Federal #13 Injection Well, API #30-015-20704, located in Section 11, T17S - R31E, 660' FSL and 660' FEL, as we could not pump the well down. As a result, the Puckett North 9 is scheduled for P & A in June of 2015.
