Describe Cause of Problem and Remedial Action Taken.\*

A temporary 12" transfer line developed a leak which caused a release of approximately 35bbls of treated produced water. When the leak was discovered the line was repaired and put back into service. Talon/LPE mobilized personnel to conduct an initial site assessment and perform soil sampling activities within the impacted area.

Describe Area Affected and Cleanup Action Taken.\*

The impacted area is in the pasture just north CR-227 and measures approximately 110' x 110'. Talon/LPE mobilized personnel to conduct an initial site assessment and perform soil sampling utilizing a backhoe. Upon receipt of analytical results from the soil sampling activities a remediation work plan will be generated and submitted to NMOCD and BLM for approval.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
