If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The backpressure valve failed on the process vessel causing fluid to go out the relief valve on the free water knockout.

Describe Area Affected and Cleanup Action Taken.*

The some of the spill was contained in 0-Perm containment around the process equipment. Due to the pressure of the release approximately 11,025 sq. ft. of caliche pad area and approximately 44,000 sq. ft. of pasture was misted by the release. A vacuum truck recovered 50 bbls of oil and 20 bbls of water from the containment, and picked up 2 bbls of oil off the ground. The equipment and pasture area was power washed. It was estimated that a total of 17 bbls oil and 15 bbls of water saturated into the soil.

The spill areas will be cleaned up in accordance to the NMOCD and BLM remediation guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
