39	Beschoe Cause of Problem and Remedian Action Taken.*					
523	Hot oiler was pumping down a flowline that had a small hole in it. The hot oiler immediately stopped and the flowline was patched. Since then the					
	patched joint of flowline has been replaced with a new joint.					
99	Describe Area Affected and Cleanup Action Taken.*					
23						
	Tetra Tech inspected site and collected samples to define spills extent. Soil that exceeded the RRAL for BTEX and TPH as well as soil with elevated chloride concentrations was removed and hauled away to Controlled Recovery, Inc., Hobbs, NM. Site was then brought up to surface grade with clean					
3	backfill material. Tetra Tech prepared closure report and submitted to NM	backfill material. Tetra Tech prepared closure report and submitted to NMOCD for review.				
33						
	I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and					
9	regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability					
33	should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health					
	or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other					
<i>"</i>	federal, state, or local Taws and/or regulations.
