This release was caused by a tank overflow due to an issue with the tran	educer valves. Vacuum trucks u	ere dispetated to recover all standing fluid
This release was caused by a tank overflow due to an issue with the training	isducer varves, vacuum trucks w	ere dispatched to recover all standing ridid.
Describe Area Affected and Cleanup Action Taken.*		
This release over ran the lined bermed area but remained on location. A	n initial scrape was completed. C	oncho will have the snill site sampled to delineate
This release over ran the lined bermed area but remained on location. An initial scrape was completed. Concho will have the spill site sampled to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation		
work.	•	
I hereby certify that the information given above is true and complete to	the best of my knowledge and u	nderstand that pursuant to NMOCD rules and
regulations all operators are required to report and/or file certain release	notifications and perform correct	tive actions for releases which may endanger
public health or the environment. The acceptance of a C-141 report by should their operations have failed to adequately investigate and remediately investigate and remedi	the NMOCD marked as "Final R	eport" does not relieve the operator of liability
or the environment. In addition, NMOCD acceptance of a C-141 report	does not relieve the operator of	responsibility for compliance with any other
federal, state, or local laws and/or regulations.
