Re: Federal 8 #1 - DCP Shut-In Production

30-015-23098

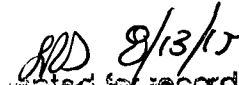

Dear Sirs,

This letter is to notify you of DCP's Force Majeure event at the Penroc Booster discharge line. At this time they are replacing 24,000 feet of 6 inch pipe as indicated in the attached email. They are estimating a shut in period of 10 weeks please note that the Federal 8 #1 will remain shut in until the pipeline replacement process is complete. Please see the attached email from DCP for further information. Should you have any questions or concerns please feel free to contact me at (432) 683-5216.

Sincerely,

H.L. Brown Operating, L.L.C.

Subject: RE: Artesia AGI PM - Curtailment Notice - UPDATE

Categories: Red Category

At this time, DCP has decided to replace 24,000 ft. of 6" pipe to replace our Penroc Booster discharge line. The line replacement has already begun, and we anticipate that this line replacement will last approximately 10 weeks. Please keep the meters below shut-in. We apologize for the inconvenience this has caused you. Formal notifications will be mailed next week. Please contact Claudia Baeza (432-620-4136) or myself if you have any questions. Thank you. -Curt

The meters below are in the Penroc area and must remain shut in until further notice:

96700-00 BROWN, H LJR #1 FEDERAL '8'

VIA CERTIFIED MAIL

To Whom It May Concern:

DCP Midstream, LP announces its intent to apply to the New Mexico Environment Department for a significant revision to air quality permit 0644-M8 for the Dagger Draw Compressor Station. The proposed revision includes adding startup, shutdown, and maintenance emissions. The expected date of application submittal to the Air Quality Bureau is March 1st, 2013. This notice is a requirement according to New Mexico air quality regulations.

This facility is a gas plant that operates 24 hours a day, 7 days a week. The facility is approximately 16 miles southwest of Artesia, New Mexico in Section 36, Range 24E, Township 19S (Latitude 32° 36' 47.15", Longitude -104° 32' 1.80"). To reach the facility from Artesia, NM: Travel 15.3 miles south on US-285 S/S 1st. Take right onto Co Rd 23/Pato Ave/Rock Daisy Rd and the facility will be on the right after 7.3 miles.

After this modification, the facility estimates its maximum quantities of any regulated air contaminant to be approximately as follows:

Air Emissions		
Pollutant	Pounds per hour	Tons per year
Oxides of Nitrogen (NOx)	40	98
Carbon Monoxide (CO)	40	99
Volatile Organic Compounds (VOC)	25	90
Sulfur Dioxide (SO ₂)	5	10
PM ₁₀	5	10
PM _{2.5}	5	10
Total Suspended Particulate (PM)	5	10
Total HAPs	5	10
Hydrogen Sulfide (H ₂ S)	2	5
Greenhouse Gas as Total CO ₂ e	10,000	25,000

The operator/owner of this facility is:

DCP Midstream, LP
10 Desta Drive Suite 400 West
Midland, TX 79705

If you have any comments about the construction or operation of the above facility, and you would like your comments to be made as part of the permit review process, you must submit your comments in writing to the address below:

Program Manager, Permit Section
New Mexico Environment Department
Air Quality Bureau
525 Camino de los Marquez Suite 1
Santa Fe, New Mexico 87505
(505) 476-4300
FAX (505) 476-4375

Other comments and questions may be submitted verbally. Please refer to the company name and site name, as used in this notice or send a copy of this notice along with your comments to help identify the facility being commented on, since the Department may not have received the permit application at the time of this notice. Once the Department has performed a preliminary review of the application and its air quality impacts, another notice from the Department will be published in the legal section of the newspaper.
