## NATURE OF RELEASE

Type of Release: Red Dye Diesel	Volume of Release: 600 gallons	Volume Recovered: 0
Source of Release: Possible vandalism	Date and Hour of Occurrence: 6/25/15 at unknown hour	Date and Hour of Discovery: 6/25/15 0900
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom? Broadbent and Associates, Inc.	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
An above ground storage tank was discovered tipped over and approximately 600 gallons of red dye diesel were released onto the caliche pad. A backhoe was used to solidify the pooled diesel with caliche from the pad. Impacted material was excavated till signs of impact were no longer present. 70.71 tons of impacted material were generated during this abatement and were transported to the Lea Land Landfill, Carlsbad, NM for disposal.

Describe Area Affected and Cleanup Action Taken.\*  
Estimated spill area was about 100' by 70' with a pooled area of about 10' X 20' on the south end of the spill. Trinity returned the following day and removed the layer of pad that was contaminated and replaced with fresh fill. PID readings of surface soil were taken to confirm cleanup and soil samples were taken. Analytical results and disposal documentation are attached.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
