REMEDIATION WORK: PUCKETT B NUMBER 8, 16, 25 AND 34

A field review of the remediation work conducted on the referenced wells is approved, the violation cases have been closed. OCD Rule 19.15.3.116.D [NMAC] requires that the responsible person for a release must complete division approved corrective action and that releases will be addressed in accordance with a remediation plan submitted to and approved by the division. This rule does not preclude the responsible person from taking appropriate actions to mitigate the impact of or contain a release prior to OCD approval but does require that site remediation activities be approved by the OCD.

Future remediation work will require submission of a site ranking and potentially a remediation work plan (as was requested in the original letter on these wells). To provide you with approval for corrective actions the OCD District 2 Office must first receive a remediation work plan that addresses, at a minimum, the following:

- Site characterization, ranking, layout, and remediation action levels and to what levels remediation work will target at each phase (i.e. excavation, land farming, tilling);
- Release characterization including source, cause, prevention of future release, volumetric estimation of impacted area(s) and contaminant specific concerns;
- On site method of remediation including specific procedures for moisture/nutrients/additives to enhance biodegradation of the contaminants, specific to Highly Contaminated/Saturated Soils and Unsaturated Contaminated Soils (as applicable);
- Off site remediation including sampling procedures for removed material, disposition of materials and documentation required (as applicable);
- Notification to NMOCD of work/sampling and sampling procedures to be used for site characterization and final closure;
- General schedule of work to be performed including periodicity of repeated work such as tilling/moisture, etc; and,
- Site closure procedures (closure of excavations, reseeding, grading, etc).

The OCD District 2 Office uses the "Guidelines For Remediation of Leaks, Spills, and Releases" to evaluate the adequacy of all remediation work plans submitted for approval. This guide may be found on our web site at: <http://www.emnrd.state.nm.us/emnrd/ocd/EH-MiscGuidelines.htm>.

Thank you for your prompt attention to this matter and your efforts in helping to protect our environment and the infrastructure of the oil and gas industry.

Puckett B No. 34 30-015-28597-00-00

Dear Mike:

Please find enclosed Release Notification and Corrective Action forms for the referenced wells which have been brought into compliance.

Please do not hesitate to call me or Jon Smith in our Maljamar office at (505) 676-2266 should you have any questions or need additional information.

Sincerely,

E. Randall Hudson III

NATURE OF RELEASE

Type of Release	Oil and Produced Water	Volume of Release	3 bbls	Volume Recovered	none
Source of Release	Flowline	Date and Hour of Occurrence		Date and Hour of Discovery	
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

RECEIVED

NOV 14 2005

OOD-ARTESIA

Describe Cause of Problem and Remedial Action Taken.*

Flowline leak due to corrosion.
Flowline has been replaced with new polypipe.

Describe Area Affected and Cleanup Action Taken.*

Sand, with native vegetation - sandy area was turned up with backhoe and then covered with clean sand - well head was cleaned up - put in new caliche and gravel.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
