13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum respectfully requests permission to flare due to abnormal system pressure in the Agave lines for a period of 90 days or until 08/31/2015.

This circumstantial flaring could result longer than 24 hour period and possibly more than the 144 hours cumulative authorized under NTL4A III.A.

we will be requesting this possible additional flaring until Agave pressures can be stabilized or other options become available. Flare volumes will be reported on OGOR.

The possibility to flare will not be consistent, therefore, the estimated/possible volume per day is 358 +/- MCF.
