BOPCO, LP respectfully submits this sundry notice for intent to commingle oil & gas production at a shared tank battery. Oil will be transported to, stored and sold from Pierce Canyon Fed 12 Battery via LACT unit into a pipeline. Gas will be transported to the same location and sold at same. Allocations will be made using well tests.

Wells to be commingled are Poker Lake CVX JV PC 005H & Poker Lake Unit CVX JV PC 008H. Battery is located on 005H location.

NMOCD and SLO are being petitioned for like approval.

All required exhibits will be submitted to BLM Carlsbad.

Duncan:

Enclosed the required documentation for the application to surface commingle production and measure and sell production off lease for the referenced wells. Five (5) copies are enclosed. Any pages BOPCO, LP would like to keep "Confidential" are so noted and are only included in your set of copies and the set to be returned to BOPCO upon approval. Also enclosed is a copy of the sundry notice previously submitted through the WIS System (for your reference).

All of this information will also be sent to you via email.

If you have any questions or need additional information, please don't hesitate call me at 432/683-2277.

Sincerely,

Tracie J Cherry
Sr. Regulatory Analyst

Enclosures

Oil & Gas metering and Allocation:

The Pierce Canyon Fed Battery has three (3), 500 bbl oil tanks on the location. Two (2) wells utilize this location as a common tank battery. Gas from both wells also flows to this battery, through a gas "allocation meter" then to either a (metered) flare or a common gas sales meter, Regency Sales Meter #57255 located on the tank battery location, SESE Sec 12 24S-29E. The Pierce Canyon 12 Fed Battery sits on the well location for Poker Lake CVX JV PC #5H

Oil production from wells Poker Lake CVX JV PC #8H & Poker Lake CVX JV PC #5H flow from their respective locations to a header located on the North side of the location. This header is configured so that the CA well production is continuously metered. Oil production is allocated daily back to each well using the subtraction method from the test meter readings from turbine test meter #128678 off the heater treater. Oil is then sold through a LACT meter (#Z3918) into the pipeline. The LACT meter is proven quarterly.

Gas production is allocated on a daily basis; volume is calculated using readings from allocation meter (Mtr ID: PC PL 7-1, Mtr #3001537029) and Regency sales meter (Mtr ID: PPC12BT, Mtr #57255). All EFM gas meters are calibrated quarterly and conform to Onshore Order 5 and API standards. The Regency gas meter is also calibrated quarterly.

Process and Flow Descriptions and Allocation Method:

The flow of production is shown in detail on enclosed facility diagram. A map is included with this application outlining lease boundaries, location of wells, facility, and gas sales meter. All wells are located inside the Poker Lake Unit boundaries.

The shared tank battery is located on the West side of the well pad for the Poker Lake CVX JV PC #5H located in the SESE Sec. 12, 24S-29E on Federal lease NMNM05912. The production from both wells will come to a common production header with isolation lines to route each well's production. This header is located on the north side of the facility.

The CA well is routed through the test equipment and will be continuously measured. Production flows to a Test Two-Phase separator, where gas is discharged into a gas line and the water/oil stream goes to heater treater. Gas from the treater combines with gas from the Two-Phase separator and is routed to a common gas line then through Electronic Flow Meter (EFM) gas test meter (Mtr #3001537029). At this point, gas will go to either the EFM metered flare stack (Mtr: PCPL12-1FL) on the North side of the location or on through the EFM check meter (Mtr #3001537518) and Regency Sales meter (Mtr #57255) on the south side of the location. Custody transfer occurs and royalty payment is made at the Regency sales meter. Production is allocated to the lease well using the subtraction method.

After separation, the CA well's produced oil and water stream go through the heater treater. Oil is metered off the heater treater using a turbine test meter (#128678). The oil then flows into an oil production line where it is combined with the other wells' oil and flows through the flash tower and then into one of the 500 bbl. oil tanks. Oil from the tanks is sold through a LACT meter (#Z3918) directly into the BOPCO PLU pipeline. The water from both wells combines in a common line and flows to one of two 500 bbl produced water tanks. Water flows from the tanks to a water disposal system.

The lease well is routed to the production side of the facility. The produced fluid stream enters a Two-Phase separator where gas is discharged into the gas line and the oil/water stream flows to the main production Free Water Knockout. After separation, water is discharged into the water line to travel to the

water tanks and oil is routed to the heater treater then through the flash tower and finally to the oil storage tanks.

Summary:

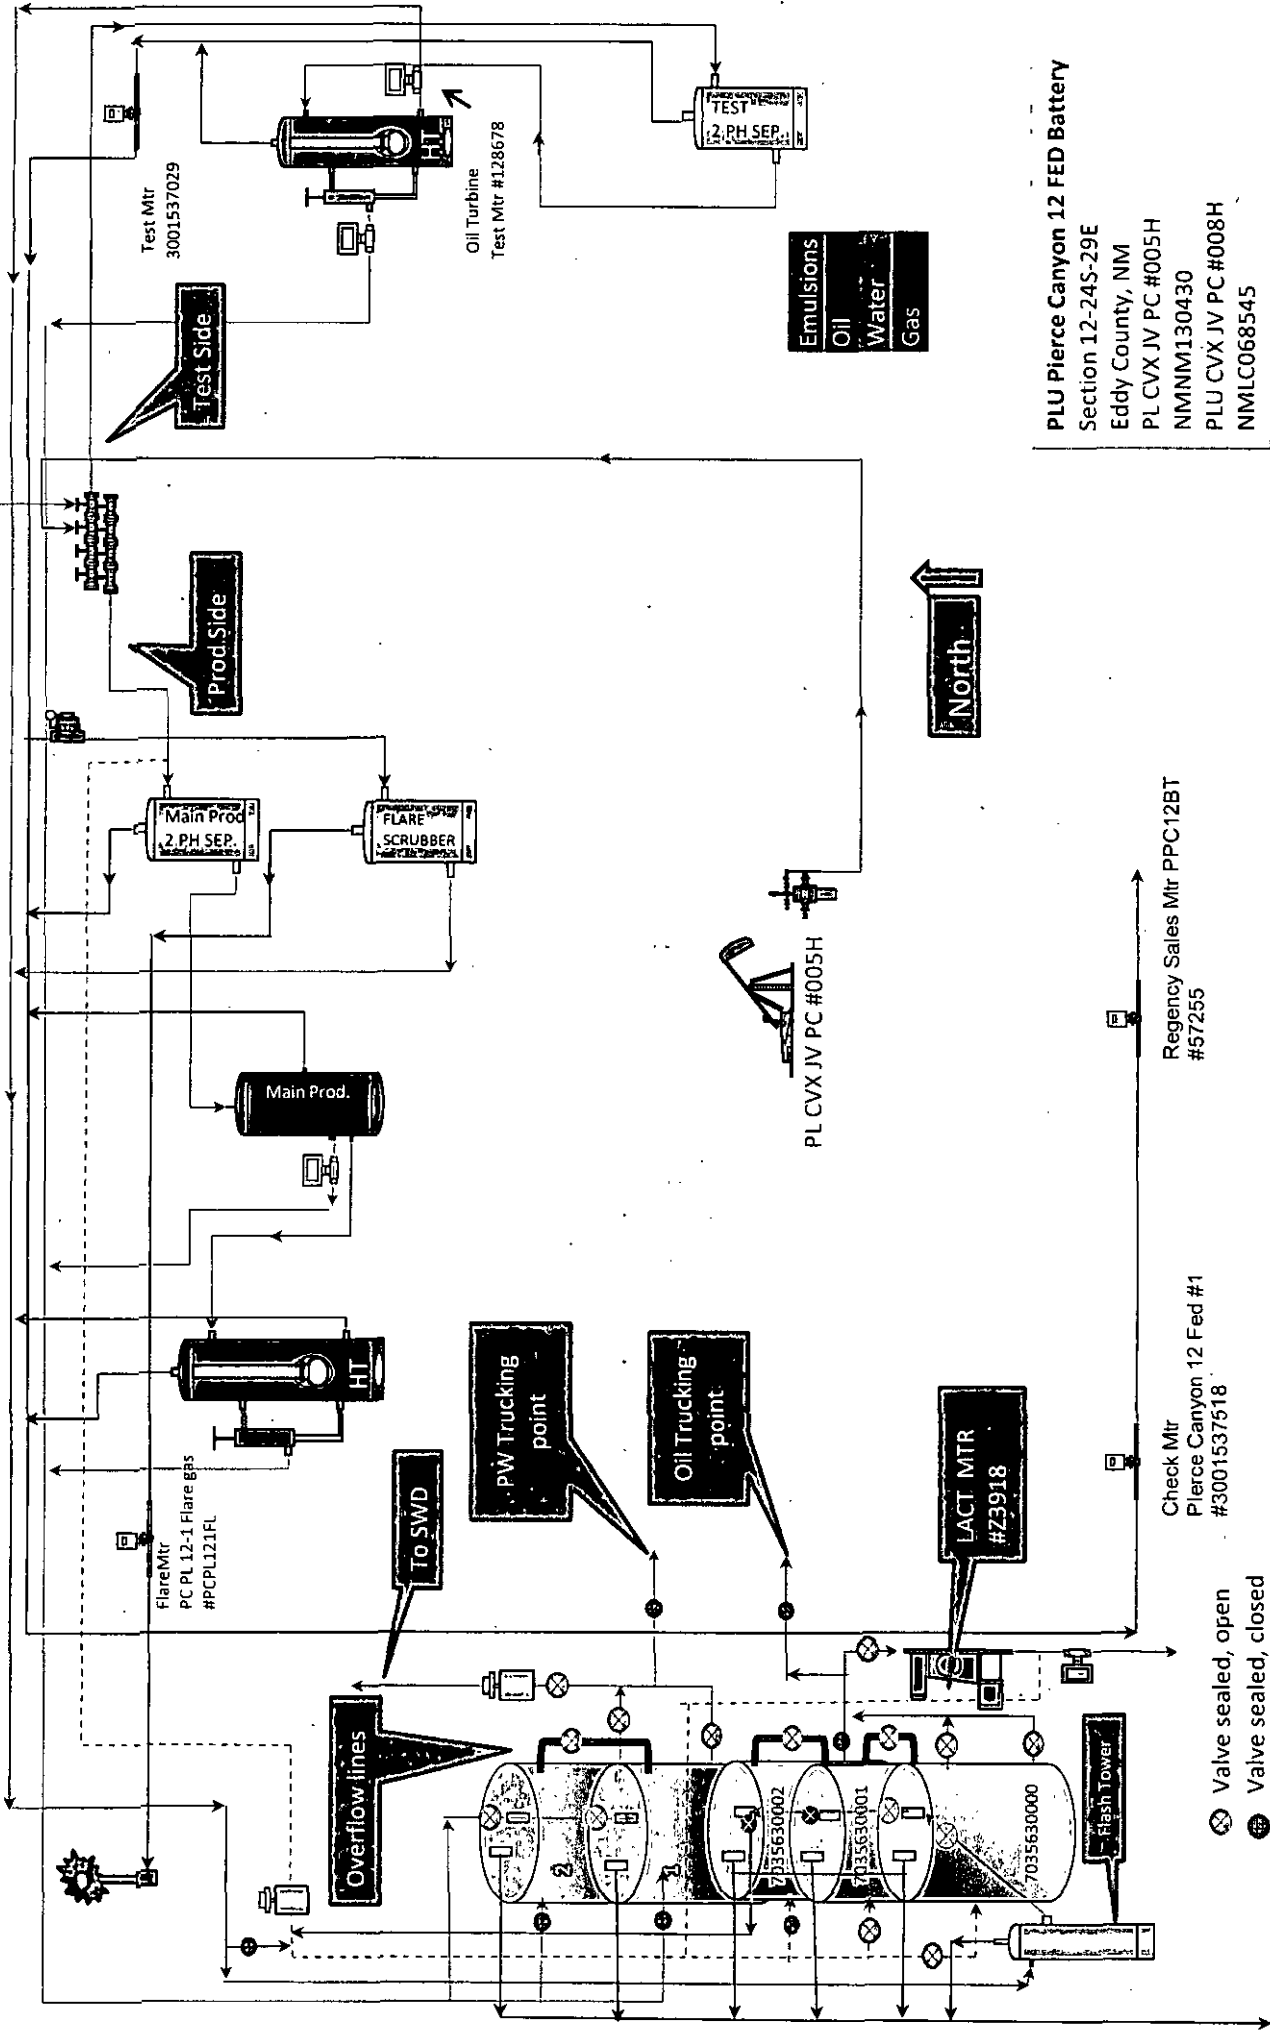

The commingling of production is in the interest of conservation and minimizing waste. BOPCO, L.P. believes this will result in the most effective and economic means of producing the reserves in place from the affected wells and will not result in reduced royalty or improper measurement of production. The proposed commingling will reduce the surface facility footprint and overall emissions.

BOPCO, L.P. understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

Working, royalty, and overriding interest owners have been notified of this proposal via certified mail (see attached).

The BLM and NMOCD will be notified of any future changes in the facilities.

RE: Application for Surface Commingling, Off Lease Sales, Storage and Measurement
Poker Lake Unit CVX JV PC 008H
Poker Lake Unit CVX JV PC 005H
Eddy County, New Mexico

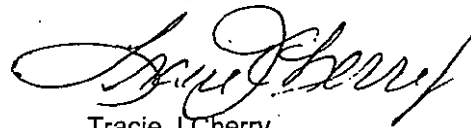

Dear Interest Owner:

This letter and attached documents are to notify you, as an interest owner, that BOPCO, L.P. is petitioning the Bureau of Land Management and New Mexico Oil Conservation Division to grant permission to commingle the production from your well (on the surface) and measure, store and sell the production, at a point outside the well's lease boundary.

The complete application contains several pages; included with this notice is information to identify the wells, their location and the location of the facility. If you would like a complete copy of the application or have any questions please feel free to contact me.

Any objections or requests for a hearing must be filed with the Oil Conservation Division, 1220 South St Frances Dr., Santa Fe, New Mexico 87505m within 20 days of this letter's date.

Sincerely,

Tracie J Cherry

1. This approval is subject to like approval by the New Mexico Oil Conservation Division.
2. This agency shall be notified of any spill or discharge as required by NTL-3A.
3. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments.
4. This approval does not constitute right-of-way approval for any off-lease activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
5. Approval for combining production from various sources is a privilege which is granted to lessees for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
6. Gas measurement for allocation must be measured as per Onshore Order #5 for sales meters.
7. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per NTL-4A to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer.
8. This agency shall be notified of any change in sales method or location of sales point.
9. Additional wells and/or leases require additional commingling approvals.
10. Notify this office 24 Hrs. prior to any meter proving to allow time for an inspector to witness.
