13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Obtained verbal approval to flare from Ed Fernandez on 04-02-15.

Yates Petroleum respectfully requests permission possible and sporadic flare due to DCP line maintenance beginning April 5th, 2015 that will cause a reduction in line capacity until April 15th, 2015.

This unavoidable flaring could result longer than 24 hour period and possibly more than the 144 hours cumulative authorized under NTL4A III.A.

Flare volumes will be measured and reported on OGOR.

The possibility to flare will not be consistent; therefore, the estimated/possible volume per day
