RECEIVED

Describe Cause of Problem and Remedial Action Taken.*

Sump tank overfilled bad check valve, bad check valve allowed produced water from the charge pump to flow back into the sump tank. Isolated the tank by closing valves upstream and downstream of sump tank.

Describe Area Affected and Cleanup Action Taken.*

7 BBL of Produced water released on a 30 x 50 area all on pad, 7 BBL of Produced water recovered. Vacuum truck was already on location. An environmental agency will be called out for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
