Describe Cause of Problem and Remedial Action Taken.*

Tank overflow due to a scrubber malfunction on the gas lift system of the well. A vacuum truck was called to the location and recovered 66 barrel of oil from the release area.

Describe Area Affected and Cleanup Action Taken.*

The tank overflowed to 0-perm containment, the majority of the fluid was contained however the containment did fail on the NE corner releasing three barrels of oil to the ground surface. A vacuum truck was called to location and recovered 65 barrels from inside the lined containment and 1 barrel of fluid from the ground surface.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
