Describe Cause of Problem and Remedial Action Taken.*

BOPCO EHS was notified of a release that occurred when the threads of a 45 elbow connection failed; the majority of the fluid was contained inside the lined firewall containment. However a small amount of oil was sprayed to the well pad. A vacuum truck was called to the location.

Describe Area Affected and Cleanup Action Taken.*

The majority of the fluid was contained inside the lined firewall containment. However a small amount of oil was sprayed to the well pad. A vacuum truck was called to the location and recovered 15 barrels of oil from the lined containment and 1.5 barrels of oil from the ground surface.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
