RE: Turner A #24 - Site Activities for Reclamation Section 19, T17S R31E API 30-015-05275

Mr. Wall,

The well and caliche pad at this site were previously removed. Detailed herein is a summary of seeding activities at the site by Diversified Field Service, Inc. (DFSI) following the removal of the well and caliche pad. On May 22, 2014, DFSI personnel tilled the site, and broadcast a total of 125 pounds of Lesser Prairie Chicken seed over the entire area. The seed was then tilled into the soil. (See Site Photographs).

Thank you for allowing DFSI to assist you in this matter. Please call me with any questions and/or comments.

Sincerely,

Natalie Gladden

Environmental Director

Reclamation Form

	e: Turnin A 24
Legal Des	cription: <u>Sec 19 TI7S R31E</u> Unit letter C
	e: 5-22-2014
Completi	on Date: 5 - 7 2 - 2014
Step 1	Remove caliche and/or all discolored material (soil, caliche, et al) for disposal.
Step 2	Look for any discolored material under pad. Sample and perform field tests. If above limits, remove 1' and resample and test. If sample is still above limits, contact Environmental director before proceeding further.
Step 3	Grid clean area and establish between 2 and 5 sample points.
Step 4	Take appropriate samples and run field tests on samples.
	Note: If any samples come back higher than allowed limit or are close to limit; contact environmental director before proceeding.
Step 5	When field sample tests are shown to be acceptable; backfill and contour soil to depth as required.
Step 6	Re-seed reclaimed area with seed required by landowner (BLM) and give seed tag to Environmental Office upon completion.
	Seed Type: L P C Lbs. Used: 125 #
Step 7	Ensure samples are taken to the appropriate Scientific Lab for analyses and <u>this form</u> is returned to the Environmental Office upon job completion.
Notes:	Pics have been and completed. Pics have been sent to Office The email on 6-3-14
