13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The tank water leg and valve busted due to flood waters that occurred during heavy rains. Valves were shut, vacuum truck(s) and roustabout crew called. An approximate area of 68 x 20 feet was affected within the bermed battery, with an additional area of 315 x 130 affected outside of the bermed battery to the east and another finger approximately 480 x 80 feet running north off the wide release area. The water valves and water leg were repaired. Vacuum trucks were called to recover any standing fluid. Excavated soils will be hauled to a NMOCD approved facility. Vertical and horizontal delineation samples will be taken and analysis ran for TPH & BTEX (chlorides for documentation). If initial analytical results for TPH & BTEX are under RRAL's (site ranking is 0) a Final Report, C-141 will be submitted to the OCD requesting closure. Depth to Ground Water: >100' (approximately 245', Section 4, T20S-R24E, per Trend Map). Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS ZERO (0). Remediation completed according to NMOCD approved Work Plan. Yates Petroleum Corporation requests closure.
