32. Additional remarks, continued

The unexpected malfunction of a DCP high line pressure has caused emergency intermittent flaring from the Corral Canyon Battery not to exceed 3000 mcf/day. The volumes flared as a result of this equipment malfunction and force majeure event constitute ?unavoidably lost? production under NTL 4A Section II.C.(2) (??Unavoidably lost? production shall mean?(2) that oil or gas which is lost because of line failures, equipment malfunctions, blowouts, fires, or otherwise??)(emphasis added) and NTL 4A Section III.A. (?Lessees or operators are hereby authorized to vent or flare gas on a short term basis without incurring a royalty obligation in the following circumstances? During temporary emergency situations, such as compressor or other equipment failures??)(emphasis added). Therefore, the flared volumes are not royalty bearing under NTL 4A. We started flaring 1/6/16 and please accept this as notice for JANUARY 2016 - MARCH 2016

REVISED TO CORRECT REJECTED FINAL SUNDRY 330396.

TOTAL FLARED: JAN=121HRS & 15,200MCF; FEB=0; MAR=0
