13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This Sundry is being written at the request of Paul Swartz. A meeting was held in the Carlsbad NM office on Monday 5/2/2016 over a subsequent report of completion denial issued by Paul Swartz. The denial was issued because verbal approval of a change in the reentry APD plan given by Chris Walls on October 13, 2015 was never executed in writing on a Sundry Notice of the same date. The change in plan involved setting a CIBP @ 11175' and capping w/ 35' of cement in lieu of setting a 200' cement plug per the COA's in the APD. In attendance at the meeting were Kevin Rogers and John Maxey representing the operator Trinity Environmental SWD, and George MacDonnell, Paul Swartz, Chris Walls, Ed Fernandez, and Jim Amos representing the BLM.

The situation concerning the above change and circumstances for the change were discussed and it was concluded that the CIBP w/ a 35' cement cap, along with the other 2 CIBP's w/ respective 35' cement caps, all set within a cased and cemented hole interval less than 2000' in borehole length

Additional data for EC transaction #338542 that would not fit on the form

32. Additional remarks, continued

was sufficient to provide zonal isolation and was in compliance with Onshore Order 2. The verbal approval received from Chris Walls on October 13, 2015 and documented on a Sundry Notice of the same date was then executed in the meeting of 5/2/2016 by Mr. Walls.

The denial was also issued because Mr. Swartz had not yet received the cement bond log run by the operator during reentry operations. That log will be electronically delivered concurrently with this sundry, whether as an attachment to this submittal, or an email to Mr. Swartz.

As a result of the above actions the denial will be rescinded. Form 3160-4 is being prepared and will be submitted shortly.

*05/06/2016 accepted for record and as full compliance
with the written order dated 04/29/2016*
